

After many years of unsustainable tax and utility increases passed on to the people of Swift Current, along with the covid difficulties, my duty is to take a stand to end the insanity. I would vote for a freeze on property taxes and utility rates in 2021. Going forward I would favour a sustainable tax reduction strategy. New projects to be environmentally friendly. Transparency has long been a problem with council. All committees and decisions should be held in public with exception of confidential issues. Responsible spending, and ending loans from city funds to private organizations and businesses as done in the past, much of which is still outstanding. Reassessing non productive assets and holdings. I would donate my base salary to local charities. I encourage all other candidates to do the same. Serving is a privilege and an honour, working hard to make life "sensible" and affordable for all.
