C.A.O. Report

Date: December 10, 2024
To: Chief Administrative Officer
From: Director of Light & Power
Subject: Electric Rate Increase - Carbon Charge – January 2025

BACKGROUND

The Federal Government implemented carbon pricing effective January 1st, 2019 which affects the City of Swift Current Light & Power Utility. SaskPower has registered for the output-based pricing system which applies the carbon charges to their various sources of generation.

SaskPower will estimate the carbon charge recovery it requires annually and set a rate rider by customer class applied to the kWh used. SaskPower will maintain a carbon charge variance account to manage any differences between the amount collected and the amount required to be paid to the Federal Government.

The carbon charge rate rider will be adjusted effective January 1st, 2025. Future carbon charge rate riders will be adjusted by any differences and increases to ensure that SaskPower remains revenue neutral in relation to the collection of the carbon charge.

The Federal Government provides a carbon charge rebate to individuals as an offset to these costs.

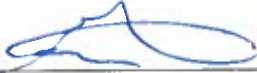

Light & Power maintains its electric rate structure similar to SaskPower to ensure equity between our customers and other electric customers in Saskatchewan. This electric rate equity also ensures that the City of Swift Current remains in a competitive position when attracting and retaining industrial, commercial and residential customers.

DISCUSSION

Light & Power is recommending implementation of the carbon charge electric rate increase effective the first billing cycle following approval of the Electrical Utility Bylaw.

RECOMMENDATION

THAT Notice of Motion be given at this time by advising the public of Council's intention to adjust the electric current usage rates in Bylaw No. 6 - 1989, being the Electrical Utility Bylaw.

Darryl Tuhall, Director of Light & Power

CAO Recommendation:

I concur with the recommendation.
